Additional receiving operations

Out of Paper Reception

As soon as the paper tray becomes empty during fax reception, the LCD shows `No Paper Fed.` Put some paper in the paper tray. (See Basic User's Guide: *Loading paper and other print media.*)

If you don't put paper in the paper tray, the machine will continue receiving the fax. The remaining pages will be stored in the memory, if enough memory is available.

Further incoming faxes will also be stored in memory until the memory is full. To print the faxes, put fresh paper in the tray. When the memory is full, the machine will stop answering calls.

Printing a reduced incoming fax

If you choose `On`, the machine reduces each page of an incoming fax to fit on one sheet of A4, Letter or Legal¹ size paper. The machine calculates the reduction ratio by using the page size of the fax and your Paper Size setting.

(See Basic User's Guide: *Paper Size.*)

¹ Only available for some countries.

- 1 Press  (FAX).
- 2 Press **Menu**, **3**, **1**, **6**.

- 2 When you hear the other machine's CNG tones, press **Mono Start** on your machine.
- 3 Press **2** to choose `Receive` to receive the fax.
- 4 Replace the handset of the external telephone.

Additional dialling operations

Combining Speed Dial numbers

Sometimes, you may want to choose from several long-distance carriers when you send a fax. Rates may vary depending on the time and destination. To take advantage of low rates, you can store the access codes of long-distance carriers and credit card numbers as Speed Dial numbers. (See Basic User's Guide: *Storing Speed Dial numbers.*)

You can store these long dialling sequences by dividing them and setting them up as separate Speed Dial numbers in any combination.

You can even include manual dialling using the dial pad.

For example, you might have stored '01632' on Address Book: #03 and '960555' on Address Book: #02. You can use them both to dial '01632-960555' as shown in the following example:

- 1 Press  (FAX).
- 2 Press  (Address Book).
- 3 Press  or  to choose *Search*. Press **OK**.
- 4 Enter **#, 03**.
- 5 Press  (Address Book).
- 6 Enter **#, 02**.
- 7 Press **Mono Start**.
You will dial '01632-960555'.

To temporarily change a number, you can use the dial pad to manually substitute part of the number. For example, to change the number to '01632-960556', you could enter the number (#03 '01632') using

 (Address Book), choose *Search*, press **OK**, press **#, 03**, and then press **'960556'** using the dial pad.

NOTE

If you must wait for another dial tone or signal at any point in the dialling sequence, create a pause in the number by pressing **Redial/Pause**. Each key press adds a 3.5 (2.5 for South Africa) second delay. You can press **Redial/Pause** as many times as needed to increase the length of the pause.

Additional ways to store numbers

Setting up Groups for Broadcasting

A Group, which is stored in a Speed Dial location, allows you to send the same fax message to many fax numbers by pressing

 (FAX),  (Address Book), Search, **OK**, #, the two-digit location number and **Mono Start**.

(See *Broadcasting* on page 9.)

First, you'll need to store each fax number in a Speed Dial location. (See Basic User's Guide: *Storing Speed Dial numbers*.) Then you can include them as numbers in the Group. Each Group uses a Speed Dial location. You can have up to six Groups, or you can assign up to 39 numbers to a large Group.

- 1 Press  (FAX).
- 2 Press  (Address Book) and ▲ or ▼ to choose *Setup Groups*. Press **OK**.
