Quick Setup Guide Start Here

Before you can use the machine, read this Quick Setup Guide for the correct setup and installation. To view the Quick Setup Guide in other languages, please visit <u>http://solutions.brother.com/</u>.

IMPORTANT

DO NOT connect the interface cable yet.

1 Unpack the machine and check the components

WARNING

Plastic bags are used in the packaging of your machine. Plastic bags are not toys. To avoid danger of suffocation, please keep these bags away from babies and children and dispose of them properly.

🖉 Note

- The components included in the box may differ depending on your country.
- Save all packing materials and the box in case for any reason you must ship your machine.
- The interface cable is not a standard accessory. Buy the appropriate interface cable for the interface you want to use (USB, Parallel or Network). The MFC-8690DW includes a USB 2.0 interface cable as a standard accessory.

USB cable

- Please make sure you use a USB 2.0 cable (Type A/B) that is no longer than 6 feet (2 meters).
- DO NOT connect the interface cable at this time. Connecting the interface cable is done during MFL-Pro installation process.
- When you use a USB cable, make sure you connect it to the USB port of your computer and not to a USB port on a keyboard or non-powered USB hub.

Parallel cable

DO NOT use a parallel interface cable that is longer than 6 feet (2 meters). Use a shielded interface cable that is IEEE 1284-compliant.

Network cable

Use a straight-through Category5 (or greater) twisted-pair cable for 10BASE-T or 100BASE-TX Fast Ethernet Network.

-

Symbols used in this guide

A CAUTION

When you move the machine, grasp the side handholds that are under the scanner. DO NOT carry the machine by holding it at the bottom.

Note

Keep a minimum gap around the machine as shown in the illustration.

C Gently shake it from side to side several times to distribute the toner evenly inside the assembly.

Put the drum unit assembly into the machine until it clicks into place.

f Close the front cover of the machine.

Pull the paper tray completely out of the machine.

While pressing the blue paper-guide release lever 1, slide the paper guides to fit the paper size you are loading in the tray. Make sure that the guides are firmly in the slots.

🖉 Note

For Legal or Folio size paper, press the release button 1 in the bottom of the paper tray and then pull out the back of the paper tray. (Legal or Folio size paper are not available in some regions.)

C Fan the stack of paper well to avoid paper jams and misfeeds.

C Put paper in the tray, and make sure that the paper is below the maximum paper mark **1**. The side to be printed on must be face down.

IMPORTANT

Make sure the paper guides touch the sides of the paper so it will feed properly.

- Put the paper tray firmly back in the machine. Make sure that it is completely inserted into the machine.
- **1** Unfold the support flap **1** to prevent paper from sliding off the face-down output tray.

Release the scanner lock

Push the lever 1 in the direction shown to unlock the scanner.

(The gray scanner lock lever is located at the back left side, under the document cover (2.)

Connect the power cord and telephone line

IMPORTANT

DO NOT connect the interface cable yet.

A Make sure that the machine power switch is off. Connect the AC power cord to the machine.

Plug the AC power cord into an AC outlet. Turn the power switch on.

🖉 Note

If Scanner Locked appears on the LCD, immediately release the scanner lock and press **Stop/Exit**. (See Release the scanner lock on page 6.) C Connect the telephone line cord. Connect one end of the telephone line cord to the jack on the machine marked **LINE** and the other end to a modular wall jack.

IMPORTANT

The telephone line cord MUST be connected to the jack on the machine marked LINE.

WARNING

The machine must be grounded using a 3-prong plug.

Since the machine is grounded through the power outlet, you can protect yourself from potentially hazardous electrical conditions on the telephone network by keeping the power cord connected to your machine when you connect it to a telephone line. Similarly, you can protect yourself when you want to move your machine by disconnecting the telephone line first and then the power cord.

🖉 Note

If you are sharing one telephone line with an external telephone, connect it as shown below.

Before you connect the external telephone, remove the protective cap **1** from the **EXT.** jack on the machine.

🖉 Note

If you are sharing one telephone line with an external telephone answering machine, connect it as shown below.

Before you connect the external telephone answering machine, remove the protective cap **1** from the **EXT.** jack on the machine.

Set the receive mode to External TAD if you have an external answering machine. See Choose the correct Receive Mode on page 8. For additional details, see Connecting an external TAD (telephone answering device) in Chapter 7 of the User's Guide.

Press or to choose your language. Press OK.

Press Stop/Exit.

Choose the correct Receive Mode

The correct Receive Mode is determined by the external devices and telephone subscriber services (Voice Mail, Distinctive Ring, etc.) you have (or will be using) on the same line as the Brother machine.

Will you be using a Distinctive Ring number for receiving faxes?

Brother uses the term "Distinctive Ring" but telephone companies may have other names for this service such as Custom Ringing, RingMaster, Personalized Ring, Teen Ring, Ident-A-Call, and Smart Ring. See *Distinctive Ring* in Chapter 7 of the *User's Guide* for instruction on setting up your machine using this feature.

Will you be using Voice Mail on the same telephone line as your Brother machine?

If you have Voice Mail on the same telephone line as your Brother machine, there is a strong possibility that Voice Mail and the Brother machine will conflict with each other when receiving incoming calls. See *Voice Mail* in Chapter 7 of the *User's Guide* for instructions on setting up your machine using this service.

Will you be using a Telephone Answering Device on the same telephone line as your Brother machine?

Your external telephone answering device (TAD) will automatically answer every call. Voice messages are stored on the external TAD and fax messages are printed. Choose External TAD as your receive mode. See the instructions below.

Will you be using your Brother machine on a dedicated fax line?

Your machine automatically answers every call as a fax. Choose Fax Only as your receive mode. See the instructions below.

Will you be using your Brother machine on the same line as your telephone?

Do you want to receive voice calls and faxes automatically?

The Fax/Tel receive mode is used when sharing the Brother machine and your telephone on the same line. Choose Fax/Tel as your receive mode. See the instructions below.

Important Note: You cannot receive voice messages on either Voice Mail or an answering machine when choosing the Fax/Tel mode.

Do you expect to receive very few faxes?

Choose Manual as your receive mode. You control the phone line and must answer every call yourself. See the instructions below.

For details, see Using receive modes in Chapter 6 of the User's Guide.

a	Press	Menu.
	Press	Menu.

- Press 0.
- C Press 1.
- Press or to choose the receive mode. Press **OK**.
- Press Stop/Exit.

Set the date and time

The machine displays the time, and if you set up the station ID the date and time will be added to each fax you send.

3	ena.	
	Press Menu.	
	Press 0.	
	Press 2.	
	Enter the last two digits of the year on pad, and then press OK .	the dial
	02.Date&Time	
	Year:2009	
	Enter & OK Key	
	(e.g. Enter 0 , 9 for 2009.)	
	Enter the two digits for the month on the pad, and then press OK .	he dial
	02.Date&Time	
	XX/XX/2009	
	Month:03	
	Enter & OK Key	

f Enter the two digits for the day on the dial pad, and then press **OK**.

⁽e.g. Enter 2, 5.)

g Enter the time in 24-hour format on the dial pad, and then press OK.

- (e.g. Enter 1 5, 2 5 for 3:25 P.M.)
- h Press Stop/Exit.

(e.g. Enter 0, 3 for March.)

You should store your name and fax number to be printed on all fax pages that you send.

- Press Menu.
- Press 0.
- C Press 3.
- C Enter your fax number (up to 20 digits) on the dial pad, and then press **OK**.

Enter your telephone number (up to 20 digits) on the dial pad, and then press **OK**. (If your telephone number and fax number are the same, enter the same number again.)

Use the dial pad to enter your name (up to 20 characters), and then press **OK**.

Note

- See the following chart for entering your name.
- If you need to enter a character that is on the same key as the last character, press to move the cursor to the right.
- If you entered a letter incorrectly and want to change it, press or b to move the cursor to the incorrect character, press Clear/Back.

Press key	One time	Two times	Three times	Four times	Five times
2	A	В	С	2	А
3	D	E	F	3	D
4	G	Н	I	4	G
5	J	К	L	5	J
6	М	N	0	6	М
7	Р	Q	R	S	7
8	Т	U	V	8	Т
9	W	Х	Y	Z	9

For more details, see Entering Text *in the* User's Guide.

Press Stop/Exit.

🖉 Note

If you make a mistake and want to start again, press **Stop/Exit** and go back to step **a**.

(USA only) The Telephone Consumer Protection Act of 1991 makes it unlawful for any person to use a computer or electronic device to send any message via a telephone fax machine unless such messages clearly contain, in a margin at the top or bottom of each transmitted page, or on the first page of the transmission, the date and time it is sent and an identification of the business or other entity or other individual sending the message and the telephone number of the sending machines or such business, other entity or individual. To program this information into your machine, see Set the date and time on page 9 and Set your Station ID on page 10.

Fax Transmission Report

Your Brother machine is equipped with a

Transmission Verification Report that can be used as confirmation that you sent a fax. This report lists the name or fax number of the receiving party, the date, time, and duration of the transmission, the number of pages transmitted, and whether or not the transmission was successful. If you want to use the Fax Transmission Report feature see Chapter 11 *Printing Reports* in the *User's Guide*.

Your machine comes set for Tone dialing service. If you have Pulse dialing service (rotary), you need to change the dialing mode.

- **2** Press **Menu**.
- Press 0.
- C Press 4.
- C Press or to choose Pulse (or Tone). Press OK.
- e Press Stop/Exit.

The dial prefix setting will automatically dial a predefined number before every fax number you dial. For example: If your phone system requires a 9 to dial an outside number this setting will automatically dial 9 for every fax you send.

- **2** Press **Menu**.
- Press 0.
- C Press 5 (For Canada, press 6).
- **C** Enter the prefix number (up to 5 digits) on the dial pad, and then press **OK**.

 You can use the number 0 to 9, #, * and !. (Press Hook to display "!".) You cannot use ! with any other numbers or characters.

If your telephone system requires a timed break recall (hookflash), press **Hook** to enter the break.

- If the pulse dialing mode is on, # and * are not available to use. (Canada only)
- Press Stop/Exit.

Automatic Daylight Savings Time

You can set the machine to change automatically for daylight savings time. It will reset itself forward one hour in the Spring and backward one hour in the Fall.

a Press Menu.
b Press 1.
c Press 4.
d Press or to choose on (or off). Press OK.
e Press Stop/Exit.

You can also register your product online using the On-Line Registration link from the installation CD-ROM or visit

http://www.brother.com/registration/.

Fill out the Product Registration and Test Sheet.

Put the sheet face up in the ADF (Automatic Document Feeder) or face down on the scanner glass.

Note

You will receive a confirmation fax of your Product Registration.

Install MFL-Pro Suite on additional computers (If needed)

If you want to use your machine with multiple computers on the network, install MFL-Pro Suite on each computer. Go to step **19** on page 28.

The installation is now complete.

For Wireless Network Interface Users

Before you begin

First you **must** configure the wireless network settings of your machine to communicate with your network access point (router). After the machine is configured to communicate with your access point (router) computers on your network will have access to the machine. To use the machine from these computers, you will need to install the drivers and software. The following steps will guide you through the configuration and installation process.

🖉 Note

- To achieve optimum results with normal everyday document printing, place the Brother machine as close to the network access point (router) as possible with minimal obstructions. Large objects and walls between the two devices as well as interference from other electronic devices can affect the data transfer speed of your documents.
- Due to these factors, wireless may not be the best method of connection for all types of documents and applications. If you are printing large files, such as multi-page documents with mixed text and large graphics, you may want to consider choosing wired Ethernet for a faster data transfer or USB for the fastest throughput speed.
- Although the Brother MFC-8690DW and MFC-8890DW can be used in a both wired and wireless network, only one of the connection methods can be used at a time.
- If you have previously configured the wireless settings of the machine you must reset the network (LAN) settings before you can configure the wireless settings again.
 On your machine, press Menu. Press 7.
 Press 0 to choose Network Reset.
 Press 1 twice for Yes to accept the change.

🖉 Note

The following instructions are for infrastructure mode.

To set up your machine in any other wireless environment you can find instructions in the Network User's Guide on the CD-ROM.

You can view the Network User's Guide by following the instructions below.

1 Turn on your computer/Macintosh. Insert the Brother CD-ROM into your CD-ROM drive.

For Windows[®]:

- 2 Choose your model and the language. The CD-ROM main menu will appear.
- 3 Click Documentation, and then click HTML documents.

For Macintosh:

- 2 Double-click Documentation, and then double-click your language folder.
- 3 Double-click top.html.

Infrastructure Mode

- 1 Access Point (router)
- 2 Wireless Network machine (your machine)
- 3 Wireless capable computer connected to the access point
- Wired computer connected to the access point

Confirm your network environment (Infrastructure Mode)

The following instructions will offer two methods for installing your Brother machine in a wireless network environment. Both methods are for infrastructure mode, using a wireless router or access point that uses DHCP to assign IP addresses. Choose a configuration method and proceed to the page indicated.

If your wireless router/access point does not support SecureEasySetup™, Wi-Fi Protected Setup or AOSS™, write down the wireless network settings of your wireless access point/router.

IMPORTANT

If you do not know this information (Network Name, WEP key, WPA2-PSK (Pre-Shared Key), LEAP or EAP-FAST) you cannot continue the wireless setup. You should see the documentation provided with your access point or wireless router, consult the router manufacturer, or your system administrator.

Item	Example	Record the current wireless network settings
Communication mode: (infrastructure)	Infrastructure	
Network name: (SSID, ESSID)	HELLO	
Authentication method: (Open system, Shared key, WPA-PSK ¹ , WPA2-PSK ¹ , LEAP, EAP-FAST)	WPA2-PSK	
Encryption mode: (None, WEP,TKIP, AES, CKIP)	AES	
Network key: (Encryption key , WEP key ² , Passphrase)	12345678	

¹ WPA/WPA2-PSK is a Wi-Fi Protected Access Pre-Shared Key, which lets the Brother wireless machine associate with access points using TKIP or AES encryption (WPA-Personal). WPA/WPA2-PSK (TKIP or AES) uses a Pre-Shared Key (PSK) that is 8 or more characters in length, up to a maximum of 63 characters.

² The WEP key is for 64-bit encrypted networks or 128-bit encrypted networks and can contain both numbers and letters. If you do not know this information you should see the documentation provided with your access point or wireless router. This key is a 64-bit or 128-bit value that must be entered in an ASCII or HEXADECIMAL format.

For example:

Now go to		page 33
128-bit Hexadecimal:	Uses 26 digits of hexadecimal data e.g. "71f2234ab56cd709e5412aa3ba"	
128-bit ASCII:	Uses 13 text characters e.g. "Wirelesscomms" (this is case sensitive)	
64-bit Hexadecimal:	Uses 10 digits of hexadecimal data e.g. "71f2234aba"	
64-bit ASCII:	Uses 5 text characters e.g. "Hello" (this is case sensitive)	

If your wireless router/access point supports automatic wireless (one-push) setup (SecureEasySetup™, Wi-Fi Protected Setup or AOSS™)

page 35

Connecting the Brother machine to the wireless network

Configure the wireless Use the and OK keys to choose settings (Typical one of the options below: If your network is Wireless Setup in configured for Authentication and Encryption you must match the settings used for your infrastructure mode) network. No Authentication or Encryption: a On your machine, press Menu, 7 (Network), 2 Choose Open System, press OK then use (WLAN), 2 (Setup Wizard). ● or ● to choose None for Press 🔺 or **v** to choose On, then press Encryption Type? and press OK. Then OK. press 1 for Yes to apply your settings. Go to step k. b The machine will search for available SSIDs. If ■ No Authentication with WEP Encryption: Choose Open System, press OK then use a list of SSIDs is displayed, use a or v ● or ● ▼ ↓ to choose wep for the to choose the SSID you wrote down in step 18 on page 32, then press OK. Go to step f. Encryption Type? and press OK. Go to step g. 🖉 Note Authentication with WEP Encryption: It will take several seconds to display a list of Choose Shared Key and press OK. available SSIDs. Go to step **g**. Authentication with WPA/WPA2-PSK If your access point is set to not broadcast the (TKIP or AES) Encryption: SSID you will have to manually add the SSID Choose WPA/WPA2-PSK and press OK. name. Go to step c. Go to step h. Authentication with LEAP: С Press • or • to choose <New SSID> Choose LEAP, press OK. Go to step i. and press OK. Go to step d. Authentication with EAP-FAST/NONE, EAP-FAST/MS-CHAPv2, EAP-FAST/GTC d Enter the SSID you wrote down in step 18 on (TKIP or AES Encryption): page 32 using the dial pad to choose each Choose EAP-FAST/NONE, letter or number. EAP-FAST/MSCHAP (EAP-FAST/MS-You can use (< and) to move the CHAPv2) or EAP-FAST/GTC, press OK. Go cursor left and right. For example, to enter the to step j. letter a, press the 2 key on the dial pad once. q Choose the appropriate key number and press To enter the number 3, press the 3 key on the **OK**. Enter the WEP key you wrote down in dial pad seven times. step **18** on page 32 using the dial pad to The letters appear in this order: lower case, choose each letter or number. upper case and then numbers. (For more information, see Entering Text for For example, to enter the letter a, press the 2 Wireless Settings on page 46.) key on the dial pad once. To enter the number Press OK when you have entered all the 3, press the **3** key on the dial pad seven times. characters. The letters appear in this order: lower case, e Press 🗛 or 🔹 to choose upper case and then numbers. Infrastructure, then press OK. (For more information, see Entering Text for Wireless Settings on page 46.)

Press **OK** when you have entered all the characters, then press 1 for Yes to apply your settings. Go to step \mathbf{k} .

Wireless Network

Windows[®] Macintosh

h Press or v to choose TKIP or AES for Encryption Type? and press OK.

Enter the WPA/WPA2-PSK password you wrote down in step **18** on page 32 using the dial pad to choose each letter or number.

For example, to enter the letter a, press the **2** key on the dial pad once. To enter the number 3, press the **3** key on the dial pad seven times.

The letters appear in this order: lower case, upper case and then numbers. (For more information, see *Entering Text for Wireless Settings* on page 46.)

Press **OK** when you have entered all the characters, then press **1** for Yes to apply your settings. Go to step \mathbf{k} .

Enter the user name and press **OK**. You can

use or box to move the cursor. For example, to enter the letter a, press the **2** key on the dial pad once.

Enter the password and press **OK**, and then press **1** to apply your settings. Go to step **k**. (For more information, see *Entering Text for Wireless Settings* on page 46.)

J Press or **v** to choose TKIP or AES for Encryption Type? and press OK.

Enter the user name and press **OK**. You can

use \checkmark or \blacktriangleright to move the cursor. For example, to enter the letter a, press the **2** key on the dial pad once.

Enter the password and press **OK**, and then press **1** to apply your settings. Go to step **k**. (For more information, see *Entering Text for Wireless Settings* on page 46.)

Your machine will now try to connect to your wireless network using the information you have entered. If successful, Connected will appear briefly on the LCD.

If your machine does not successfully connect to your network, verify your network settings collected in step **18** on page 32, then repeat steps **a** to **j** to make sure you have entered the correct information.

If your access point does not have DHCP enabled you will need to manually configure the IP address, subnet mask and gateway of the machine to suit your network. See the *Network User's Guide* for details.

Wireless setup is now complete. A four level indicator at the top of your machine's LCD will show the wireless signal strength of your access point or router.

To install MFL-Pro Suite, continue to step **20**.

For Windows[®] Users:

Now go to

page 37

For Macintosh Users:

page 41

k

(ງ່າ) For Wireless Network Users

Configure the wireless settings using the automatic wireless (onepush) method

Confirm your wireless router or access point has the SecureEasySetup[™], Wi-Fi Protected Setup or AOSS[™] symbol as shown below.

Place the Brother machine within range of a SecureEasySetup[™], Wi-Fi Protected Setup or AOSS[™] access point/router. The range may differ depending on your environment. Refer to the instructions provided with your access point/router.

C Push the SecureEasySetup[™], Wi-Fi Protected Setup or AOSS[™] button on your wireless router or access point. See the user's guide for your wireless router/access point for instructions.

C On your machine, press Menu, 7 (Network), 2 (WLAN), 3 (SES/WPS/AOSS).

Press or to choose on, then press **OK**.

This feature will automatically detect which mode (SecureEasySetup™, Wi-Fi Protected Setup or AOSS™) your access point uses to configure your machine.

🖉 Note

If your wireless access point supports the Wi-Fi Protected Setup (PIN Method) and you want to configure your machine using the PIN (Personal Identification Number) Method, see Using the PIN Method of Wi-Fi Protected Setup in the Network User's Guide on the CD-ROM.

Connected, the machine has successfully connected to your router/access point. You can now use your machine with your wireless network.

If the LCD shows Setting WLAN, Connecting SES (Connecting WPS or Connecting AOSS), then Connection Fail, the machine has not successfully connected to your router/access point. Try starting from step **c** again. If the same message is indicated again, reset the machine back to the default factory settings and try again. For resetting, see *Restore the network settings to factory default* on page 45.

If the LCD shows Setting WLAN, then Connection Fail Or Connection Error, a session overlap or connection failure was detected (see the table below). The machine has detected 2 or more routers/access points on your network that have the SecureEasySetup[™], Wi-Fi Protected Setup mode or AOSS[™] mode enabled. Make sure that only one router/access point has the SecureEasySetup[™], Wi-Fi Protected Setup mode or AOSS[™] mode enabled and try starting from step **c** again.

If the LCD shows Setting WLAN, then No Access Point, the machine has not detected your router/access point on your network with the SecureEasySetup[™] mode, the Wi-Fi Protected Setup mode or AOSS[™] mode enabled. Move your machine close to the router/access point and try starting from step **c** again.

LCD messages when using the SES/WPS/AOSS control panel menu

Setting WLAN	Searching or accessing the access point and downloading settings from the access point.
Connecting SES/WPS/AOSS	Connecting to the access point.
Connection Fail	Connection failed.
Connection Error	A session overlap was detected.
Connected	The machine has successfully connected.
No Access Point	The access point detection failed.

🖉 Note

OK!

If you encounter a problem during setup, temporarily place your machine closer to the wireless access point, and go back to step **c**.

Wireless setup is now complete.

Wireless setup is now complete. To install MFL-Pro Suite, continue to step **20**.

For Windows[®] Users:

Now go to page 37 For Macintosh Users: Now go to page 41

Install the Drivers & Software (Windows[®] 2000 Professional/XP/XP Professional x64 Edition/ Windows Vista[®])

Before you install MFL-Pro Suite

A Make sure that your computer is ON and you are logged on with Administrator rights.

IMPORTANT

- If there are any programs running, close them.
- Make sure a USB Flash memory device is not inserted into the machine.
- The screens may differ depending on the operating system.
- The supplied CD-ROM includes ScanSoft[™] PaperPort[™] 11SE. This software supports Windows[®] 2000 (SP4 or greater), XP (SP2 or greater), XP Professional x64 Edition and Windows Vista[®]. Update to the latest Windows[®] Service Pack before installing MFL-Pro Suite.

IMPORTANT

Disable all personal firewall software (other than Windows[®] Firewall), anti-spyware or antivirus applications for the duration of the installation.

Install MFL-Pro Suite

Put the supplied CD-ROM into your CD-ROM drive. If the model name screen appears, choose your machine. If the language screen appears, choose your language.

🖉 Note

If the Brother screen does not appear automatically, go to **My Computer (Computer)**, double-click the CD-ROM icon, and then double-click **Start.exe**.

The CD-ROM main menu will appear. Click Initial Installation.

If you are not using the Windows[®] Firewall, see the User's Guide for your software for information on how to add the following network ports.

- For network scanning, add UDP port 54925.
- For network PC-Fax receiving, add UDP port 54926.
- If you still have trouble with your network connection, add UDP port 137.

Wireless Network

Windows®

If the machine is configured for your network, choose the machine from the list, and then click **Next**.

🖉 Note

- You can find your machine's IP address and the node name by printing out the Network Configuration List. See Print the Network Configuration List on page 45.
- If your wireless settings fail, an error message will appear during the installation of MFL-Pro Suite and the installation will be terminated. Confirm your network setting by following the on-screen instruction. If you encounter this failure, please go to step **18** on page 32 and setup the wireless connection again.

- If you are using WEP and the LCD displayed 'Connected' but your machine is not found, make sure you entered the WEP key correctly. The WEP key is case sensitive.
- If the machine is not yet configured for use on your network, the following screen appears.

Click **OK** and then **Configure IP Address**. Enter an IP address for your machine that is suitable for your network by following the onscreen instructions. If you do not want to monitor the machine status and error notification from your computer, uncheck **Enable Status Monitor** and then click **Next**.

The installation of the Brother drivers will automatically start. The installation screens appear one after another.

IMPORTANT

DO NOT cancel any of the screens during the installation. It may take a few seconds for all screens to appear.

🖉 Note

For Windows Vista[®], when this screen appears, click the check box and click **Install** to complete the installation correctly.

When the **On-Line Registration** screen is displayed, make your selection and follow the on-screen instructions. Once you have completed the registration process, close your web browser to return to this window. Then click **Next**.

Windows[®] Macintosh Wireless Network

Windows®

Finish and restart

Click Finish to restart your computer. After restarting the computer, you must be logged on with Administrator rights.

🖉 Note

If an error message appears during the software installation, run the Installation Diagnostics located in Start/All Programs/Brother/ MFC-XXXX LAN (where MFC-XXXX is your model name).

If this screen appears, choose the firmware update setting and click **OK**.

<text><text><text><image>

🖉 Note

Internet access is required for the firmware upgrade.

Install MFL-Pro Suite on additional computers (If needed)

If you want to use your machine with multiple computers on the network, install MFL-Pro Suite on each computer. Go to step **20** on page 37.

🖉 Note

The MFL-Pro Suite Software License permits installation on up to 5 network computers. If you want to install MFL-Pro Suite on additional computers, you can purchase additional NL-5 (five user) license agreements from your authorized Brother dealer or contact Brother customer service.

Finish

The installation is now complete.

🖉 Note

XML Paper Specification Printer Driver The XML Paper Specification Printer Driver is the most suitable driver when printing from the applications that use the XML Paper Specification documents. Please download the latest driver by accessing the Brother Solutions Center at http://solutions.brother.com/.

Windows[®] Macintosh Wireless Network

Wireless Network

Macintosh

🖉 Note

- You can find your machine's IP address and the node name by printing out the Network Configuration List. See Print the Network Configuration List on page 45.
- If your wireless settings fail, the installation of the MFL-Pro software will be terminated. Confirm your network settings. If you encounter this failure, go to step **18** on page 32 and setup the wireless connection again.
- If this screen appears click **OK**.

· Enter a name for your Macintosh in Display Name up to 15 characters long and click OK. Go to step g.

- If you want to use the machine's **Scan** key to scan over the network, you must check the Register your computer with the "Scan To" function on the machine box.
- The name you enter will appear on the machine's LCD when you press 🕋 and choose a scan option. (For more information, see Network Scanning in the Software User's Guide on the CD-ROM.)
- g When this screen appears, click OK.

The installation of MFL-Pro Suite is now complete. Go to step 22 on page 42.

When Presto! PageManager is installed OCR capability is added to Brother ControlCenter2. You can easily scan, share and organize photos and documents using Presto! PageManager.

а

Double-click Presto! PageManager and follow the on-screen instructions.

Install MFL-Pro Suite on additional computers (If needed)

If you want to use your machine with multiple computers on the network, install MFL-Pro Suite on each computer. Go to step 20 on page 41.

The installation is now complete.

BRAdmin Light utility (For Windows[®] users)

BRAdmin Light is a utility for initial setup of Brother network connected devices. It also can search for Brother products on your network, view the status and configure basic network settings, such as IP address. For more information on BRAdmin Light, visit us at <u>http://solutions.brother.com/</u>.

🖉 Note

If you require more advanced printer management, use the latest Brother BRAdmin Professional utility version that is available as a download from <u>http://solutions.brother.com/</u>.

Install the BRAdmin Light configuration utility

Click Network Utilities on the menu screen.

Click **BRAdmin Light** and follow the on-screen instructions.

Set your IP address, Subnet Mask and Gateway using BRAdmin Light

🖉 Note

If you have a DHCP/BOOTP/RARP server in your network, you do not have to do the following operation. The machine will automatically obtain its own IP address.

Start BRAdmin Light. It will search for new devices automatically.

Searching for Devices	
Searching network for 6 seconds.	Stop Searching
New Device: 1 (Unconfigured: 1)	

Double-click the unconfigured device.

🖉 Note

The default password for the machine is 'access'. You can use BRAdmin Light to change this password.

C Choose STATIC for the Boot Method. Enter the IP Address, Subnet Mask and Gateway, and then click OK.

onfigure TCP/IP Address Network	E
Bot Method AUTO STATIC DHCP RARP BOOTP	
IP Address Subnet Mask	xxx.xxx.xxx
Gateway	XXX.7
	OK Cancel Help

d

The address information will be saved to the machine.

For Network Users

BRAdmin Light utility (For Mac OS X users)

BRAdmin Light is a utility for initial setup of Brother network connected devices. It also can search for Brother products on your network, view the status and configure basic network settings, such as IP address from a computer running Mac OS X 10.3.9 or greater.

The BRAdmin Light software will be installed automatically when you install the printer driver. If you have already installed the printer driver, you do not have to install BRAdmin Light again. For more information on BRAdmin Light, visit us at http://solutions.brother.com/.

d

Set your IP address, Subnet Mask

and Gateway using BRAdmin Light 🖉 Note If you have a DHCP/BOOTP/RARP server in your network, you do not have to do the following operation. The machine will automatically obtain its own IP address. • Make sure that version 1.4.2 or greater of Java e client software is installed on your computer. The default password for the machine is 'access'. You can use BRAdmin Light to change this password. a Double-click Macintosh HD on your desktop. f \bigtriangledown 0 Macintosh HD b Choose Library, Printers, Brother and then Utilities. С Double-click the file BRAdmin Light.jar and run the software. BRAdmin Light will then search for new devices automatically.

Double-click the unconfigured device.

Choose STATIC for Boot Method. Enter the

The address information will be saved to the machine.

For Network Users

Web Based Management (web browser)

The Brother print server is equipped with a web server that allows you to monitor its status or change some of its configuration settings, using HTTP (Hyper Text Transfer Protocol).

🖉 Note

- The User Name is 'admin' and the default password is 'access'. You can use a web browser to change this password.
- We recommend Microsoft[®] Internet Explorer 6.0[®] (or higher) or Firefox 1.0 (or higher) for Windows[®] and Safari 1.3 for Macintosh. Please also make sure that JavaScript and cookies are always enabled in whichever browser you use. To use a web browser, you will need to know the IP address of the print server. The IP address of the print server is listed on the Network Configuration List.
- Open your browser.
- Type http:// printer_ip_address /into your browser (Where "printer_ip_address" is the IP address of the printer or the print server name).

You can find the IP address of the machine on the Network Configuration List. See *Print the Network Configuration List* on page 45. For example http://192.168.1.2/

See Chapter 11 of the Network User's Guide.

Print the Network Configuration List

You can print the Network Configuration List to confirm the current network settings. To print the Network Configuration List:

- Make sure that the front cover is closed and the AC power cord is plugged in.
- Turn on the machine and wait until the machine is in the Ready state.
- C Press Menu, 6, 6.
- Press Start.

The machine will print the current network settings.

Restore the network settings to factory default

To restore all network settings of the internal Print/Scan server to factory default, please follow the steps below.

- Make sure the machine is not operating, then disconnect all the cables from the machine (except the power cord).
- Press Menu, 7, 0.
- C Press 1 to choose Reset.
- Press 1 to choose Yes.
- C The machine will restart, re-connect cables once this is complete.

Entering Text for Wireless Settings

Most number keys have three or four letters printed on them. The keys for 0, # and \star do not have printed letters because they are used for special characters.

By pressing the proper number key repeatedly, you can access the character you want.

Press Key	One time	Two times	Three times	Four times	Five times	Six times	Seven times	Eight times
2	а	b	С	А	В	С	2	а
3	d	е	f	D	Е	F	3	d
4	g	h	i	G	Н	I	4	g
5	j	k	I	J	К	L	5	j
6	m	n	0	М	Ν	0	6	m
7	р	q	r	s	Р	Q	R	S
8	t	u	v	Т	U	V	8	t
9	W	х	у	z	W	Х	Y	Z

For configuring wireless network settings

Putting spaces

To enter a space in a name, press **b** twice between characters.

Making corrections

If you entered a letter incorrectly and want to change it, press or box to move the cursor under the incorrect character, press **Clear/Back**. Re-enter the correct character. You can also back up and insert letters.

Repeating letters

If you need to enter a letter that is on the same key as the letter before, press by to move the cursor right before you press the key again.

Special characters and symbols

Press *, # or 0 repeatedly until you see the special character or symbol you want. Press OK to choose it.

Press *	for	(space) ! " # \$ % & ' () * + , /
Press #	for	:;<=>?@[]^_\~`` {}
Press 0	for	0\{ }~

Options and Consumables

Options

Lower Tray Unit	SO-DIMM Memory
LT-5300	
Second lower paper tray unit can hold up to 250 sheets of paper. When the tray is installed, the machine expands total input capacity up to 550 sheets.	You can expand the memory by installing a (144-pin SO-DIMM) memory module.

For more details about the optional Lower Tray Unit and compatible SO-DIMM Memory please see the *User's Guide* or visit <u>http://solutions.brother.com/</u>.

Replacement consumables

When the time comes to replace consumable items, an error message will be indicated on the LCD. For more information about the consumables for your machine, visit <u>http://www.brother.com/original/</u> or contact your local Brother re-seller.
